#### First Quarter 2024 Financial and Operational Highlights

- Driving new business growth: First Year Premiums ("FYP") more than doubled sequentially and increased by 29.7% year-over-year to RMB857.2 million, reflecting the progress Huize made in acquiring high-value customers, driving long-term insurance product innovation, and expanding its international presence.
- Strengthening operating leverage: Operating expenses decreased by 24.9% year-over-year to RMB81.2 million and the expense-to-income ratio decreased by 10 percentage points to 26.2% from the same period of 2023.
- Cumulative number of insurance clients served increased to 9.6 million as of March 31, 2024. Huize cooperated with 120 insurer
  partners, including 74 life and health insurance companies and 46 property and casualty insurance companies, as of March 31, 2024.
- As of March 31, 2024, cash and cash equivalents were RMB281.4 million (US\$39.0 million).

Mr. Cunjun Ma, Founder and CEO of Huize, said, "We are pleased to report strong FYP growth and our sixth consecutive quarter of profitability which reflected the resilience of our business and the progress we have made in acquiring high-quality customers, increasing customer lifetime value, diversifying our product offerings, optimizing our omnichannel distribution capabilities, and expanding into international markets starting with Hong Kong."

"We continue to seize market opportunities by enriching our offerings of savings products including participating and annuity products, resulting in 77% year-over-year increase in FYP for savings products and a record high average ticket size for savings products of approximately RMB69,000 in terms of FYP. Moreover, leveraging our comprehensive IFA (Independent Financial Advisers) platform, high quality lead generation and strong sales conversion capabilities of the DTC (Direct-To-Consumer) segment and successful penetration into the Hong Kong market, we have further maximized the LTV (Lifetime Value) potential of our customers, as reflected in our high repeat purchase rate for long-term insurance products of 40.4%, a 70% increase in FYP facilitated by our IFA platform and revenue contribution of 7% from our Hong Kong brokerage business in the first quarter. As of the end of February, cumulative persistency ratios for long-term insurance in the 13th and 25th months remained at industry-high levels of more than 95%."

"Looking ahead, we are committed to capitalizing on the long-term growth opportunities of the insurance industry in China and across Asia. Our strategic focus will remain on customized insurance product innovation for our targeted demographic sub-segments, platform efficiency and productivity improvement driven by our investment in proprietary AI capabilities, international expansion and digitalization. We will continue to diversify our revenue streams by expanding our Hong Kong business and exploring opportunities in the emerging markets of Southeast Asia where we can replicate our proven business model. As we further optimize the functionality of our insurance AI products, we believe we are uniquely positioned to meet customers' demand for personalized content and services, support distribution partners in improving productivity, and address insurance carriers' needs for market insights and risk management."

#### First Quarter 2024 Financial Results

Operating revenue was RMB310.3 million (US\$43.0 million) in the first quarter of 2024, an increase of 3.8% from RMB298.9 million in the same period of 2023. The increase was primarily driven by the increase in FYP facilitated.

Operating costs were RMB220.2 million (US\$30.5 million) in the first quarter of 2024, an increase of 22.4% from RMB179.8 million in the same period of 2023, primarily due to an increase in channel expenses.

#### **Operating expenses**

Selling expenses were RMB44.2 million (US\$6.1 million) in the first quarter of 2024, a decrease of 21.5% from RMB56.3 million in the same period of 2023, primarily due to a decrease in salaries and employment benefits related to employees with sales functions.

General and administrative expenses were RMB22.6 million (US\$3.1 million) in the first quarter of 2024, a decrease of 32.5% from RMB33.5 million in the same period of 2023. Research and development expenses were RMB14.4 million (US\$2.0 million) in the first quarter of 2024, a decrease of 21.5% from RMB18.3 million in the same period of 2023, primarily due to a decrease in salaries and employment benefits for research and development personnel, as well as a decrease in outsourcing labor costs.

#### **Use of Non-GAAP Financial Measure Statement**

In evaluating our business, we consider and use non-GAAP net profit/(loss) attributable to common shareholders as a supplemental measure to review and assess our operating performance. The presentation of the non-GAAP financial measure is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. We define non-GAAP net profit/(loss) attributable to common shareholders as net profit/(loss) attributable to common shareholders excluding share-based compensation expenses and interest on convertible bond. Such adjustments have no impact on income tax because either the non-GAAP adjustments were recorded at entities located in tax free jurisdictions, such as the Cayman Islands or because the non-GAAP adjustments were recorded at operating entities located in the PRC for which the non-GAAP adjustments were not deductible for tax purposes.

We present the non-GAAP financial measure because it is used by our management to evaluate our operating performance and formulate business plans. Non-GAAP net profit/(loss) attributable to common shareholders enables our management to assess our operating results without considering the impact of share-based compensation expenses and the interest on convertible bond. We also believe that the use of this non-GAAP financial measure facilitates investors' assessment of our operating performance.

This non-GAAP financial measure is not defined under U.S. GAAP and is not presented in accordance with U.S. GAAP. The non-GAAP financial measure has limitations as an analytical tool. One of the key limitations of using adjusted net profit/(loss) attributable to common shareholders is that it does not reflect all items of income and expense that affect our operations. Further, the non-GAAP financial measure may differ from the non-GAAP financial information used by other companies, including peer companies, and therefore their comparability may be limited.

The non-GAAP financial measure should not be considered in isolation or construed as an alternative to net profit/(loss) attributable to common shareholders or any other measure of performance or as an indicator of our operating performance. Investors are encouraged to review the historical non-GAAP financial measure in light of the most directly comparable GAAP measure, as shown below. The non-GAAP financial measure presented here may not be comparable to similarly titled measure presented by other companies. Other companies may calculate similarly titled measures differently, limiting the usefulness of such measures when analyzing our data comparatively. We encourage investors and others to review our financial information in its entirety and not rely on a single financial measure.
